JAYENDRA KAMBLI

Software developer| java developer

Personal Information

Current Address:
Sopan nagar,wadgaonsheri,
Pune-411014,
Maharashtra

Permanent Address:
At post Kankavli,Sindhudurg

Phone:
+91 8208764332

Email:
jayendra.kambali@gmail.com

Date Of Birth:12/06/1992

Gender:Male

Languages
Known:English,Hindi,Marathi

Professional Skills

- Core Java.
- Advanced java.
- j2ee,Jsp,Servlets
- Spring 3MVC Framework.
- Spring boot,Microservices
- Restful apis,Git,jira
- Mybatis,Hibernate
- Html,Css,javascript jquery
- Mysql and oracle database

Summary

Skilled Senior developer with 4+ years of experience in Java development and utilizing java tools for client server environments. Hands on experience in java-based applications. Strong Experience in retail and payments domain.

.

Skill Highlights

- Learning Enthusiast
- Ready to adapt with new technologies

Experience

Senior Analyst – 08/2022-present
Crisil Limited,Pune

Projects:
1) **Payment Gateway System for Crisil (In-house project)**

Key highlights and responsibilities:

- Application enabled Crisil to process online payments securely an efficiently. It included processing of payments,

  payments reconciliation and fraud prevention.

- Application was developed in spring boot. Restful apis to retrieve, insert, update payment data. Kafka with other Crisil microservices for interservice communication and mongo dB on the db. end. Application was deployed on OpenShift.

- Used junit for automated testing, SonarQube for code quality and Jenkins as CI/CD tool.

- My responsibility was to perform payments operation for users like adding, updating and retrieval of data also test the code for same. Perform code coverage using SonarQube and used Jenkins for CI/CD. Also wrote queries for the above operations specific to mongo db.

- **Technologies:** Java8, Microservices,Rest,,Springboot,junit

- **Duration:**09/2022-02/2023

Associate Consultant – 2/8/2021-present
Atos,Pune

3) Identity(PayPal):

Key highlights and responsibilities:

Identity comprises of multiple components working together to form single application.It is mostly used to verify identity of the user.I worked on Scimserv and SecuretokenServ component.In scimserv we needed to migrate from old caching tool mayfly to new caching tool juno.Classes and methods used in mayfly needed to be changed to juno also ramping of code was done to slowly migrate from mayfly to juno.In Securetokenserv we mostly needed to check if classes are passing in geo environment.

Technolgies:Raptor framework,Spring boot, Rest ervices,Junit,TestNg
Duration -August 2021 – April 2022

Software Developer - 10/2018 to 29/7/2021
Anveshak Technologies And Knowledge Solutions,Pune

Projects:
1) **ERP system for Supply Management**
- ERP system handles supply and management of automobile parts of our client pgfilters**.**
- Developed backend functionalities for Erp system.
- Database integration along with frontend development
- Testing developed functionalities

Technologies Used:Spring Mvc,ibatis, mysql,html,css,javascript,jquery,Svn
Duration:2018-present
Website link: http://premiumguard.com/ERP/home
